CyberPilot
Security Culture

Communication to employees BEFORE the survey

Subject: Please answer the upcoming questionnaire about cybersecurity

Hello everyone

Soon you will receive an email with a questionnaire from CyberPilot. We are working with them to improve our IT security level. In the questionnaire, you can anonymously give your input on our culture regarding IT security and data protection. It's a chance for you to be heard about your challenges and suggestions for solutions.

It's crucial that everyone participates so that we map the culture for the entire organisation and that we get your input, as you are our most important defence and source of feedback in this area.

It takes about 2 minutes (there are 10 questions) and it's important that you complete it within a week.

The link in the email leads to the website "cyberpilot.typeform", which is the survey tool used for this questionnaire.

We will use the results to work more efficiently and human-centred with cybersecurity and data protection. We look forward to your feedback and will share the results with you afterwards.

 If you have any questions about this, please feel free to contact me.

Communication to employees AFTER the survey

Subject: Thank you for your feedback

Hi everyone!

Thank you so much for taking the time to answer the cybersecurity and data protection questionnaire. Your feedback is really important to us.

Here are our results:
Our overall score on security culture is X (from 0 to 100).
Divided into categories it looks like this: [insert picture]

We will use the results and the comments you shared to improve our approach to protecting our data and systems. Together we can become even better at it!

If you have any questions, please let me know.
